SUMMARY

Junior Front-End Developer with a strong foundation in React.js and Tailwind CSS. Skilled in transforming complex Figma designs into high-quality, responsive, and functional code with a focus on Pixel-Perfect implementation. Experienced in state management, API integration, and writing clean, maintainable code. A fast learner who thrives in collaborative environments and is dedicated to building seamless user experiences.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Frameworks & Libraries: React.js, Tailwind CSS, React Router, Bootstrap

Tools: Git, GitHub, Postman, VS Code

UI/UX & Collaboration: Figma, Responsive Web Design, Translating Designs into Code

PROJECTS

E-Commerce Storefront | *React.js - Tailwind CSS - React Router - DummyJSON API*

- Developed a fully responsive e-commerce web application featuring dynamic product listing, category filtering, and detailed product views.
- Integrated DummyJSON REST API to fetch and manage real-time product data, implementing efficient data handling and Dynamic Routing.
- Implemented client-side authentication and session management using **js-cookies** to maintain user state and auth securely.
- Optimized project architecture with a professional Folder Structure for better scalability and maintainability.

Personal Portfolio Website | *React - Bootstrap - React Router - Vite* | [GitRepo](#)

- Developed a modern, responsive Single Page Application (SPA) to showcase a professional profile and a collection of web development projects.
- Optimized performance and deployed the application for public access, demonstrating proficiency in frontend architecture.

Interactive Web Apps – To-Do List & Bookmarker | *JavaScript - Bootstrap - Local Storage* | [GitRepo](#)

- Developed functional applications to strengthen core JavaScript concepts.
- Implemented DOM manipulation, event listeners, and Local Storage for persistent data.
